

# Play it!

# #MathsEveryoneCanAtHome

Cards are a great way to enjoy time with your loved ones and there is so much maths involved.

Use 4 lots of 1-9 digit cards to play our card games. Use paper or left-over cardboard to make them or remove the picture cards from a set of playing cards.

Do you have your own favourite card game?

Share the rules with us so we can all play!

## Go Fish (KSI)

Aim: To make pairs with number bonds to 10

1. Deal 5 cards to each player. The remaining cards are placed in a pile.
2. Take turns asking other players for a particular card to make a number bond to 10. If the player doesn't have the card, they say 'Go Fish!' The player picks a card from the pile. Pairs that make 10 are placed down.
3. The game ends when 1 player has no cards.
4. The player with the most pairs wins.

## Multiply! (KS2)

Aim: To win the most pairs of cards by multiplying the quickest.

1. Put all the cards face down on a flat surface.
2. Each player takes turns to turn 2 cards over.
3. All players must multiply the numbers together, the first player to shout out the answer wins the pair.
4. The player with the most pairs wins.
5. Make the game harder by turning 3 cards over at a time.
