

If I know $3 \times 6 = 18$, I also know...

$$3 \text{ cm} \times 6 = 18 \text{ cm}$$

$$6 \text{ litres} \times 3 = 18 \text{ litres}$$

$$3 \text{ m} \times 6 = 18 \text{ m}$$

True

The calculations are all built upon the calculation of $3 \times 6 = 18$
